

Working student for CAD department (m/f/d)

You have a keen eye for detail and excel at working carefully and reliably. With your technical understanding and your quick comprehension it is easy for you to grasp the essential elements of technical drawings and to transfer them into 3D environments.

Job Description:

- Primarily: Transferring our 2D design drawings into 3D models using Autodesk Inventor.
- Supplementary: support of our technical draftsman in the design of custom-made kitchens

Your profile:

- Previous experience in CAD design is desirable as well as, at best, initial experience with Autodesk Inventor and AutoCAD.
- High reliability as well as a thorough and independent way of working.
- You have an eye for details
- Confident IT skills in MS Office and Adobe Acrobat round off your profile
- Fluent German / English skills

We offer:

- Flexible working hours
- Possibility to work from home
- Your own workstation in a cooperative working atmosphere with up-to-date CAD software (2020)
- An attractive salary
- The office location is Halstenbek - with very good connections to public transport and in direct proximity to the A7/A23. Parking spaces for employees are available.

We are looking forward to your application!
